Black Friday Vape Deals in Nairobi & Thika: iPlay Elite 12,000 and KK Energy 8,000 at D-LYT Vapes

Black Friday falls on 27 November this year, but D-LYT Vapes started its sale early. The November Deals category now has 18 products, from budget 8,000-puff devices up to 50,000-puff heavyweights. This catalog covers two of the most asked-about picks: the iPlay Elite 12,000 Puffs and the KK Energy 8,000 Puffs. Both are KSh 200 off, both are rechargeable disposables, and both are available in Nairobi and Thika.

iPlay Elite 12,000 Puffs: KSh 1,800 (was KSh 2,000)

iPlay Elite 12,000 puffs Black Friday deal at D-LYT Vapes Nairobi and Thika

The **iPlay Elite 12,000 Puffs** is the one with a screen. A small display on the base shows 100% and a droplet icon on the poster. That means you can see how much battery and liquid is left instead of guessing why the last few puffs tasted weak. The metal-look body comes in colours like pink and mint green, and it feels a step up from the plastic sticks most people grab at the counter.

The flavour list is long, with twelve to pick from:

- **Fruit:** Pineapple Twist, Mango Coconut, Paradise Fruits, Watermelon Rush, Tropical Grape, Ultimate Berry
- **Fruit blends:** Peachy Berry, Grape Strawberry, Kiwi Grape, Strawmelon
- **Mint:** Black Mint, Arctic Mint

If you like to switch flavours, this is a good device to have. Mango Coconut and Arctic Mint are about as far apart as two flavours get.

KK Energy 8,000 Puffs: KSh 1,200 (was KSh 1,400)

KK Energy 8,000 puffs Cool Mint Black Friday offer Kenya

The **KK Energy 8,000 Puffs** is the cheaper way in. It has dark, anime-style artwork on the body, and the flavour menu is short: Cool Mint, Lush Ice, Peach Mango and Mango Ice. Three of the four are cold. Only Peach Mango skips the ice.

A short list is not always a bad thing. Fewer flavours means less time deciding, and if you already know you like mint or iced mango, you can order in one message.

Which one should you buy?

Here is a small detail we noticed: the two devices cost exactly the same per puff. KSh 1,800 for 12,000 puffs works out to KSh 150 per 1,000. KSh 1,200 for 8,000 puffs is also KSh 150 per 1,000. So the sale price shouldn't decide it. What should is flavour and features.

Pick the iPlay Elite if you want the screen and a bigger menu. Pick the KK Energy if you want to spend less today and already know you like mint or mango. Keep in mind that puff counts are the manufacturer's rating. How long a device lasts depends on how often you use it.

Spending a bit more? Other Black Friday deals

Frequently asked questions

No. The store does not refill disposable vapes.

Where can I get these deals?
